Study in GIES...

Graduate Institute of
European Studies

曾玟瑄 Iris

I am Iris , I graduated from the Spanish Department of Wenzao. I served as both teaching assistant and research assistant before entering GIES and now work as assistant in USR project. Currently, I'm about to start my thesis and try to finish it in two years!

ABOUT GIES...

To make yourself more competitive and become a "shining star" in the future, studying in GIES could be very helpful. It will make you have a chance to choose the ideal career after graduating from GIES.

The diversity of courses offered by GIES has enabled me to gain a deeper understanding of the EU, and the full-English class allow me to actually share my opinions and perspectives with students from different countries.

The professors in GIES are very professional and supportive, which makes it a good learning environment for students to start your thesis! If you are interested in European Studies, then welcome to join GIES :)
